Description

Slender and sinuous lines trace the harmonious profile of the RIVA 92 DUCHESSA. The large windshield perfectly integrates with the boat's slim, aggressive look, offering excellent visibility from the steering station, while the wide windows on the upper deck ensure incredible brightness in the salon and the dining area.

The spacious master cabin on board the RIVA 92 DUCHESSA is located amidships and features an equally spacious full-beam bathroom located behind the bed. This new glazing design with two portholes lets in plenty of light and ensures effective natural ventilation. The master cabin can be accessed directly from the main deck through an independent and private stairway.

Another peculiarity on the RIVA 92 DUCHESSA is that the garage can host a tender up to 3.20 meters in length and a jet-ski; alternatively, thanks to its lowered position, the garage is openable with a sliding beach club and chaises longues, thus creating an additional relaxation area just above the sea surface.

This fine example of the RIVA 92 DUCHESSA luxury flybridge motor-yacht, features comprehensive equipment and very low hours.
