Description

The Arno LEOPARD 27 Motor Yacht is 27 metres in length. She was built at the famous Italian shipyard of Cantiere Navale Arno.

This is a fine example of the highly successful LEOPARD 27. Having had the same Owners since new and the same captain since only a few months after launching, her maintenance and presentation are well documented and evident respectively.

Her silver Awl grip paint makes her stand out to any observer, while her clever layout and customised interior are appreciated by Owners and guests alike. The décor is modern with Wenge and chrome mainstays. Her interior and exterior seamlessly blend in with one another and are all in sync with the yachts design, performance and philosophy.

The combination of her hull design large MTU engines and Arneson Surface Drive Propulsion system make her an impressive yacht underway, whether her Owners just want to get there fast or simply enjoy the thrill of raw speed and power.

With original owners, always privately used, VAT paid and immaculate condition, this LEOPARD 27 is simply stunning and worth viewing.
