Description

The FERRETTI CUSTOM LINE NAVETTA 28 motor yacht represents lightness, agility and clean lines as well as the art of balancing full and empty spaces, a harmony of soft and heterogeneous shapes that are always consistent with each other. A wise volume, which welcomes those who experience the sea projecting them towards a horizon of calm.

On board the CUSTOM LINE NAVETTA 28, the unmistakable outdoor space hosts a panoramic dining area with circular sliding glass doors. The lateral lines are streamlined and fast, with a continuous window that extends from stern to bow to make the light even more protagonist. The management of the space on the upper deck is flexible, dedicated to living and conviviality, but with particular attention to privacy.

In the interiors, always customizable, the spaces are modulated by light: below decks and on the main deck, this compact tri-deck vessel is equipped with innovative hull windows at the height of the 4 guest cabins, with invisible portholes glued to the glass itself. The saloon welcomes guests with a large open space organized to create a harmonious dialogue between spaces with different functions: the galley is to starboard, while proceeding towards the bow leads to the area reserved for the owner's main deck stateroom.

Navigation is synonymous with simplicity, hospitality, conviviality. The entertainment system can be controlled with a single one-touch support (VOTIS), while, to increase comfort, the boat is equipped with both underway electro-hydraulic fins for navigation and gyroscopic zero-speed stabilizers at anchor.

In the aft area, this CUSTOM LINE NAVETTA 28 is equipped with the Dual Mode Transom system, a Ferretti Group patent. The playful and living space is further expanding, bringing together a foldable garage, diving platform and a large beach club, never expected on models of similar footage, into a single system.

This FERRETTI CUSTOM LINE NAVETTA 28 for sale is pure balance of proportion. With this displacement vessel, Custom Line has created a design masterpiece that embodies perfection, and which is built under the 24m load-line length.

Powered by twin 1200 Hp MAN Diesel engines, this tri-deck motor yacht is built as a semi-displacement vessel, reaching top speeds of 15 knots and comfortably cruising at 12 knots.
