Description

This is a fabulous opportunity to purchase an immediate delivery ASTONDOA AS5 with only 140 engine hours and transferable warranties. Fully equipped, this splendid unit of the very successful AS5 series, features a zero speed Seakeeper gyroscopic stabilizer, highly manoeuvrable Volvo IPS drives, assisted docking, dynamic positioning, Volvo interceptor trim system, a home automation control system, and much more. This flybridge cruiser was delivered to her sole Owner in July 2022 and is VAT and Spanish registration tax paid.

The ASTONDOA AS5 is a 17.35-meter-long mid-size motor yacht that imitates the lines of supercars by taking them to the sea and designed to meet the wishes of sportive owners who also love beauty and contemporary design combined with luxury, which this Iberian model does not fail to display. This is a fascinating vessel, whose flybridge allows a 360° panoramic view surrounded by a full glass canopy. Her T-top should be seen as a useful choice providing this AS5 an extra touch of beauty.

Transparency is particularly emphasized on the main deck: the saloon and the galley are both glazed, and it is in this characteristic that the inspiration of the world of supercars appears with precise aerodynamics dominated by sharp and clean lines up to the bow, grafted transversely on the water and armed with a steel tip from which the anchor can be easily lifted.

What seduces about the profile of this stylish and elegant flybridge cruiser is the glazed trapezoid which constitutes almost the entire main deck, to which is added the wide horizontal glass line which characterizes the entire lower deck, where the cabins almost touch the sea.

The Owner's cabin spreads throughout the entire beam of the boat, with modern furnishings that meet rounded lacquered surfaces, suspended in the air to make room for LED lights on the ground. Total "habitability" is also reserved for two additional cabins for passengers. There is a beautiful bathroom, fitted with a designer sink and large mirror and shower room to complement the decor of the walls in a rich marble veining.

The living room is accessed from the aft cockpit through a generous sliding door, also glazed. Here, the wood of the floor meets the aluminium frame reflecting off the walls. There is also room for a Home Cinema, with your guests sitting on the comfortable sofas to admire it. Continuing vertically on the flybridge, we find another "pleasant and intimate" space to share with friends while sailing. The cockpit is absolutely "ergonomic" and designed specifically to mimic the avant-garde design of sports cars.

With the highly manoeuvrable Volvo IPS 950 drives installed on the main wheelhouse, the flybridge and a third cockpit control station, this ASTONDOA AS5 can reach a top speed of 32 knots and comfortably cruises at 26 knots, while having an economical cruising speed of 22 knots.
