Description

This prime example 31.45-meter ASTONDOA 102 GLX motor yacht for sale built in 2005 by the renowned Spanish shipyard Astondoa is perfectly maintained and has undergone a one million Euro extensive refit in winter 2022, for which the Owner has spared no expense. She is presented like a brand-new yacht, fully serviced and finds herself in pristine condition with a successful charter record.

This large flybridge yacht is a well-proportioned fibreglass vessel which represents the “Astondoa style”, accentuated by modern, sporting lines, at the same time being extremely elegant, both inside and out. The ASTONDOA 102 GLX design participates in the most recent trends but has its own distinctive personal touches, which combine various aesthetic elements creating the yacht's personality.

The ASTONDOA 102 GLX is classified as a raised pilothouse yacht, with two and a half decks and a command bridge located between the main deck and the flybridge. Her profile features three large lateral windows, the largest of which illuminates the saloon. The window on the bow illuminates the service areas whereas the upper lateral window is the natural continuation of the windscreen of the command bridge.

With her recent refit featuring state-of-the-art updates and upgrades, she offers an evolution in her 6-cabin layout, design and construction. She can now comfortably accommodate up to 12 guests in the lower deck, including a Master cabin with king size double bed and private en-suite, 2 VIP cabins with double beds and 2 twin cabins with single bed + 1 Pullman bed. The Captain's cabin on the main deck can also be utilized as an additional guest cabin. All cabins have en-suite facilities with shower room.

She features an elegant and comfortable main saloon fitted with carpets and soft furnishings. The adjoining dining area is just forward of the saloon where guests can dine indoors in a formal atmosphere. There is also the opportunity to dine in the fresh air on the aft deck where up to 16 guests can be seated. There are additional sunpads forward of the yacht and aft of the flybridge.

Fitted with zero speed stabilizers and powered by twin 2285 Hp MTU Diesel engines, she reaches a top speed of 25 knots, while cruising at 18 knots.

Viewings are highly recommended in Spain.
