## Description

Built and delivered in 2022, this 32.3m SANLORENZO SL106A motor yacht for sale, was designed by Zuccon International Project and her naval architecture was developed by Sanlorenzo.

With private use only, EU VAT paid and full options including underway and at anchor dual stabilization system, this SANLORENZO SL106A represents a unique opportunity for immediate delivery.

Aiming to obtain greater usability of the interior spaces, and better access to the exterior, the Asymmetric models push usable interior space out to the full beam on port side, where there's no traditional side deck. There is still a side deck to starboard, and the twin stairways leading from the swim platform to the main deck aft.

Thanks to this asymmetrical layout, the main deck not only benefits from a larger surface area of 10 m<sup>2</sup>, but also features a spacious dining area on port side with a full-height window with sole-to-ceiling glass that merges with hull, offering a continuous and homogeneous surface and overlooking the sea. A vast lounge/saloon area on starboard side benefits from a folding terrace.

The bow area offers a 20 m<sup>2</sup> space with integrated sun loungers and a convertible dinette, and can be reached through a dedicated access from the almost 30 m<sup>2</sup> Owner's cabin. The fully customised flybridge, of approximately 60 m<sup>2</sup>, is connected to the foredeck.

This SANLORENZO SL106A comfortably accommodates 10 guests in 5 en-suite staterooms, each with state-of-the-art entertainment systems and amenities.

The main deck forward Master stateroom also feels airy because of a rectangular window forward, directly over the bed. This stateroom has a door to the starboard-side deck. Push a button, and there's access to the foredeck settee with a table for a private breakfast or snack. A few steps up on the port side are a vast sunpad and the stairs to the flybridge.

Three double VIP cabins and a twin cabin are found on the lower deck, to complete the guest accommodation aboard. Three additional crew cabins with integrated facilities are located towards the bow on the lower deck, with an intelligent access to favour maximum privacy.

With very low hours, this SANLORENZO SL106A is powered by twin 2434 Hp MTU engines, providing a maximum speed of 28 knots, a cruise speed of 24 knots, and an economical speed of 10 knots for a maximum range of 1280 nautical miles.

Early viewings are highly recommended.

## KEY FEATURES
